

Cloud SMS Router

The A to Z SMS termination solution to increase revenue

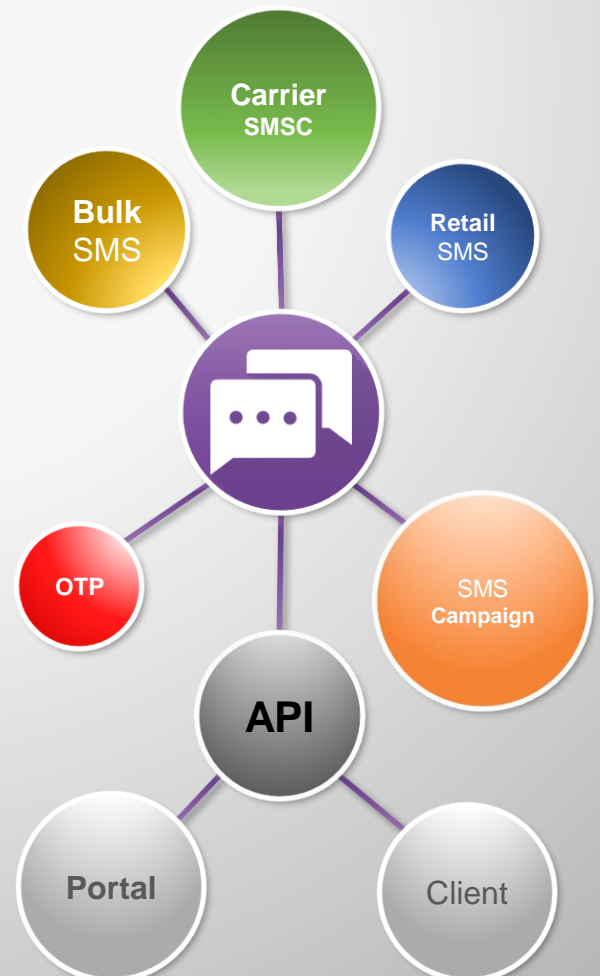

The highest SMS throughput ratio over mobile networks

SIMBERRY Cloud SMS Router is a turnkey SMS solution designed to send SMS to **iGates**, third part gateways and SMSC. It is the perfect match for OTP, Bulks SMS and SMS wholesales business.

The **Cloud SMS Router**, works closely with our Hosted SIM server to provide the highest throughput ever for sending SMS over gateway GSM ports. It synchronizes data from your SIM server to provide exact GSM gateway capacity available. SMS tracking & monitoring over gateways provides accurate report for GSM port and IMSI (SIM card) SMS traffic information. Filtering & Content Process features protect SIM cards against blockage

The **Cloud SMS Router** is 100% web based solution, managing **customers** and vendors with unlimited TPS & SMPP/HTTP connections, controlling SMS **rates & volume**, handling SMS **campaigns**, including tools for **test** and **simulation** and SIM Card protection with filtering and **content processor unique features**.
